NEW TERMS OF SALE—Net Cash Prices.

FOR a number of years it has been our custom to offer a series of premiums on orders in the shape of discounts, etc. Realizing that in many instances this was complicated and confusing to purchasers, we have decided to abandon all such, and to reduce our prices to a corresponding or even lower level, a plan which we feel will be more satisfactory to buyers in every respect. Congress has passed a law imposing 25 per cent. duty on all imported flowering bulbs, but we have decided to maintain our very low prices of last year, which were hardly above cost of importing, and we look forward to your future orders for our compensation tripling that you will remember us to your friends and neighbors next spring.

We offer them carefully divided into separate colors, which will enable you to set out beds at a marvelously low price.

ROMAN HYACINTHS.

WE WISH to call special attention to these beautiful Roman Hyacinths, which are so valuable for early Winter blooming. Three can be planted in a four or five inch pot, and will soon be in flower. In the garden they are first of all Hyacinths to bloom. We offer extra large bulbs. Do not fail to plant a good lot of them for Winter.

The Grape Hyacinth, Improved.

This charming little gem should be found in every garden in abundance. It has been termed the “Blue Lily of the Valley,” and when planted in a mass with that sweet flower it does resemble it to some extent, and forms a most fascinating combination. It grows about the same height and blooms about the same time each Spring. It increases rapidly, and when once planted a mass of beautiful blossoms, which will increase each year, is insured for a lifetime. But for Winter blooming in pots it is of the greatest value. Plant five or six bulbs in a five-inch pot and you will have as lovely a pot of bloom as you can imagine. Words fail to do it justice.

The flowers grow a foot in height, bearing a dense spike of sky-blue bells tipped with white, and oh! so lovely. Please remember that ours is an improved strain of Grape Hyacinth, much superior to the old form.

Take the winds of March with beauty.”
—SHAKESPEARE.

Giant Flowered Narcissus or Daffodils

NOTE—In describing Narcissus we have referred to the "perianth" and "trumpet," the latter being the long center, funnel-like tube, and the "perianth" is the surrounding rows of petals or leaves. All Narcissus on this page are hardy for garden planting, also excellent for Winter flowering indoors.

THE CHINESE SACRED LILY.

The "Shui Sin Far," or Water Fairy Flower, Joss Flower or Flower of the Gods, etc., as it is called by the Celestials, is a variety of Narcissus bearing in lavish profusion chaste flowers in silvery-white, with golden-yellow cups. They are of exquisite beauty and entrancing perfume. It is grown by the Chinese according to their ancient custom, to herald the advent of their new year, and as a symbol of good luck. The bulbs are grown by a method known only to themselves, whereby they attain great size and vitality, ensuring luxuriant growth and immense spikes of flowers. In fact, the incredibly short time required to bring the bulbs into bloom (four to six weeks after planting) is one of the wonders of nature. "You can almost see them grow," successfully almost everywhere and with everybody. They do well in pots of earth, but are novel and beautiful grown in shallow bowls of water, with enough fancy pebbles to prevent them from toppling over when in bloom. A dozen bulbs started at intervals will give a succession of flowers throughout the winter. Cut. We are importing direct from China immense bulbs of the true large-flowering variety. Price, 15 cents each; 5 for 50 cents. A dozen bulbs planted one a week will give a supply of flowers all winter.

THE BEST LILIES FOR PLANTING.

"The fairest of all things that blossom and grow,
Sweet as the Summer and pure as the snow,
Is the Lily that tells,
Like the glad Easter Bells,
Once more the sweet story which all hearts should know."

The True Bermuda Easter Lily, Lilium Harrisii—See cut.

This peerless Lily is the greatest acquisition to floriculture in many years. Their profusion of bloom, the remarkably short time required to bring them into flower, and the certainty to produce abundant bloom, and also the ease with which they can be manipulated to be flowered at any desired period, such as Christmas, Easter and other special occasions, render them invaluable. The flowers are delightfully fragrant, pure waxy-white, of great substance, and if cut as soon as they are open, or partially open, they can be kept for two weeks. A short time only is required to bring them into bloom. Bulbs potted in August can be had in flower in November if required. A succession of bloom can be kept up from November to May by bringing the pots of rooted bulbs in from cold frames at intervals throughout the Winter. The quantity of bloom produced is marvelous, the average production of bulbs five to seven inches in circumference, even when forced, is from five to eight flowers, and of bulbs seven to nine inches, eight to twelve flowers; and if desired a second crop of flowers, frequently equal to the first, can be secured the same season by drying the plants off after blooming for a time and then again starting them. Blooming plants in new typical Easter offerings and presents, for decoration of the window, table, house or church, nothing is more appropriately beautiful and highly appreciated. Thousands upon thousands are sold in the large cities every Winter for this purpose. As a garden Lily it is of great beauty, being entirely hardy excepting in northern climates, where it requires a protection of leaves or litter to a depth of 5 or 6 inches. Price, for large bulbs, 15 cents each; 4 for 60 cents; 10 for $1.00.

Lilium Auratum—The Golden-Banded Lily.

Of the many Lilies we owe to Japan, none can compare with the Great Golden-Banded Lily. It is the grandest of all Lilies for growing in the open ground or in pots; entirely hardy, last for years, increasing in size and beauty each season. Stalks 4 to 6 feet high, crowned with masses of splendid white and gold flowers, 4 to 6 inches in diameter. The odor is fascinating. We offer fine, strong bulbs sure to bloom; standard size, first quality. 25 cts. each; 3 for 60 cents.

TIGRINUM, fi. pl. (Double Tiger Lily) This magnificent Lily is borne in immense clusters on tall stems; the flowers are very large, frequently six inches across, and very double, color, deep, fiery red, spotted with black; any illustration gives but a faint idea of the showiness of this superb Lily. Price, 10 cents each; 3 for 60 cents.

LILUM SUPERBUM—Finest of our native Lilies. Flowers bright orange yellow, red spotted. Large bulbs, 20 cts. each; 8 for 60 cents.

LILUM CANDIDUM—(The Madonna or Annunciation Lily. This Lily is the emblem of purity. The deep lemon anthers contrast beautifully with the waxy petals. The fragrance is delicious and never oppressive. Berlin Mammoth Lily of the Valley.

No flower is more tenderly lovely than this. Its graceful waxen bells are filled to overflowing with the most delicious perfume, and set among its own glossy green leaves it is indeed the gem of the garden. It succeeds in the open ground in almost any situation, but prefers a somewhat moist location. A top dressing of well rotted manure or rich soil in the Autumn will be found a great benefit. For house culture they are invaluable and easily managed. Place rather thickly in pots or boxes, scattering a little soil or turfy loam among the roots, but not over the tops, then cover with moss or some such substance and place out doors until a sharp frost, when they should be brought indoors and given plenty of heat and considerable moisture. Take care to keep them shaded from the hot sun with cloth until the stems are two or three inches high, when the shading should be removed to develope the flower. They make a charming sight, when grown in large patches, in partially shaded localities around the lawn, near the borders of streams, lakes, springs, etc.

Price for the Berlin Mammoth Large Flowering Lily of the Valley, 5 cents each; 6 for 25 cents, 12 for 40 cents. Ready in November for shipment.

They thrive best in a moist situation, and planted out in May will flower in July. Are desirable for growing in water, placing the bulb in a vase or bowl, treating same as Hyacinths. Admirably adapted for pot culture and can be forced into flower in from six to eight weeks. Strong Blooming bulbs, 20 cents each; 3 for 50 cents.

ATAMASCO LILLIES.

"Zephyr Flowers" and "Flowers of the West Wind" are among our most beautiful dwarf bulbous plants, very effective for planting out in masses in May, flowering with great profusion during the Summer. They are also most suitable for pot culture; 5 to 12 bulbs clustered in a 6-inch pot in the Autumn will give a fine display of bloom during the Winter in the window garden, conservatory, etc. See cut. 6 cents each; 60 cents per dozen.

We send instructions with each order as to plant, grow, and care for all kinds of White Lilies.
This class of bulbous plants is among the finest of all flowers. The French Ranunculus especially are distinguished by great strength, size and beauty. They attain to a height of from ten to fifteen inches, and the hues and colors of their many varieties, varying from pure white and yellow to bright vermilion and crimson, are really beautiful. The Persian Ranunculus are a little smaller than the French, and also more dwarf. However, their colors are as fine and exhibit the most beautiful shades, and are of the most graceful form. The Turkish or Turkish, Ranunculus differ very much from each other, and display lovely oriental beauty of coloring. Can be grown easily in pots or out of doors if protected. See cut.

**FRENCH RANUNCULUS**—Price, 4 cts. each; 40 cts. per doz.

**PERSON RANUNCULUS**—Price, 3 cts. each; 30 cts. per doz.

**ERYTHRIONIUM GRANDIFLORUM.**

*(Giant Dog's Tooth Violet.)*

A beautiful large flowering variety, perfectly hardy: the foliage is charmingly variegated, and a mass of 15 or 20 plants is a pretty sight, even when not in flower, but when the graceful flowers are in bloom, the effect is matchless. The plants luxuriate in rather moist, partially shaded positions, and do very nicely when grown in pots in frames and brought into the conservatory or window garden for Winter-blooming. This variety bears from 6 to 12 yellow or cream-colored flowers on stems 18 to 24 inches high. 3 for 10 cts; 30 cts. per dozen.
Ornithogalum Arabicum.
The Star of Bethlehem.

We introduce this as a new Winter blooming bulb of great beauty and value. In magnificence there is nothing like it among Winter-blooming bulbs or plants. Even the grand Hyacinth must be preceded by the stately beauty of this flower. It is a native of Arabia. Bulb large and solid, closely resembling that of a Hyacinth, and requiring exactly the same culture. Leaves long and narrow; flower spikes 18 to 24 inches high, strong and graceful, bearing an immense cluster of large pearly-white flowers, having a jet black center. The individual flowers keep perfect many weeks before fading, so that for more than a month this grand spike of bloom is in full glory. Its durability is almost without an equal among flowers. Add to this its delicate aromatic fragrance, and we have a Winter-bloomer almost without a rival. Its culture is the easiest, as it will grow in any position in any window. A bulb can be planted in a four-inch pot, or several in a larger pot or box. Pot in September, October, or November. They can even be kept and planted as late as February first. For open ground culture they do well if kept from freezing severely.

IRIS--Flowering Flag--Fleur de Lis.

Hardy Spring-blooming plants, bearing large, rich and various colored flowers. They are of easy culture and thrive in any good garden soil. They are perfectly hardy without protection and require but little care. All the varieties can be forced into early bloom in the house and make a cheerful display.

IRIS SUSIANA--If every lover of flowers could see this grand plant in bloom, we really believe not one in one hundred would refuse to pay one dollar each for one or more bulbs of it. Among all flowers there is hardly one of such oddity and striking beauty. The bloom is of enormous size, and in describing it we say "it is chocolate and black mottled, beautifully veined with grayish white," yet from this no one can form a correct idea of how the plant looks. It is indescribable, and the planter will be surprised when he sees it. It is perfectly hardy, and blooms in May. In July the foliage dies down, and the bulbs lie dormant until late Fall or the next Spring. Try it, and when it blooms you will undoubtedly pronounce it the most beautiful flower in your garden. Ready in November. Price, 15 cents each; two for 25 cents.

IRIS ENGLISH--Large flowers, rich blue shades predominating; mixed. 5 cents each; 6 for 25 cents.

IRIS GERMANICA--These are neat, robust, hardy herbaceous early-blooming plants, with large ornamental flowers of rich and elegantly blended colors, exquisitely striped with dark violet, purple, or bronzed lines, upon a lighter ground. They grow to two or three feet in height, and are admirably adapted for gardens. 10 cents each; three for 25 cents; seven for 50 cents.

IRIS SPANISH--This sort blooms two weeks earlier than the English, various colors, from golden yellow, dark brown, bronze, dark blue, purple, light blue and white, extremely beautiful and grand for cut flowers. 2 Bulbs for 6 cents; 12 for 25 cents.
CROCUS, ... THE FIRST FLOWERS OF SPRING ... GAY FLOWERING CROCUS OF MANY COLORS.

The Crocus is one of the first flowers of Spring, and one of the best for blooming in the house during Winter. Half a dozen bulbs may be planted in a pot and will make a pretty show. For garden culture plant the bulbs 2 inches deep and 2 or 3 inches apart. They are so cheap and so pretty they ought to be found in every garden in abundance. They bloom splendidly when planted on the lawn among the grass. They lift up their bright heads through the sod very early, and give the lawn a charming aspect. The sorts we offer are especially strong and fine.

Price, 10 cents per dozen; by mail, 60 cents per 100; by express, 80 cents per 100, at purchaser's expense.

CHIONODOXA LUCILLE, Glory of the Snow.

One of the most lovely flowering Spring bulbous plants ever introduced, producing spikes of lovely azure-blue flowers, with pure white centers. It is one of the earliest of all flowers, blooming before the Crocus, and sure to be more than satisfactory to those who plant it. For Winter-blooming this bulb is also lovely. Price, strong home-grown bulbs, 3 cents each; 12 for 30 cents.

THE FLORAL FIRE-CRACKER (Brodiaea Coccinea.)

This beautiful and interesting Winter-blooming bulb is a sort of Brodiaea, but entirely unlike any other variety in both form and color. It is a striking beauty, and one that catches every eye. Its blooms are borne in clusters at the end of long, slender stems, and droop like a Fuchsia. They are two or three inches in length, of a deep, bright crimson scarlet color, tipped with green and white. It is among the easiest of all bulbs to grow, and is sure to succeed and bloom elegantly with any one. Pot the bulbs at any time during the Fall, and treat them as recommended on leaflet accompanying each order. In this lovely flower our friends will find a most beautiful and novel thing, and unlike anything you have ever grown or seen. Price, fine bulbs, 5 cents each; 6 for 25 cents.

CAMASSIA—The "Quanash" of the Indians; perfectly hardy, thriving in sheltered and partially shady situations; very handsome and valuable for flower borders; the stout flower stalks grow from 2 to 3 feet high and bear 20 or more large blue flowers each 2 inches across. The flowers are fine for cutting. 3 for 10 cents, 25 cents per dozen.
Freesia Refracta Alba.

No description can do adequate justice to this beautiful plant. The flowers are two inches long and about the same in width, shaped like miniature Gladioli, and borne in clusters of six to ten on depressed horizontal scapes. The body of the flower is pure white, with lower segments spotted lemon-yellow. The perfume is delicious, being a mixture of Mignonette, Violet and Jasmine, and one plant is sufficient to perfume a large room, without the overbearing perfume of Hyacinths and Tuberoses. The plant has tooth-shaped bulbs and flat-spreading leaves. Its cultivation is of the simplest, requiring only to be potted in October, to be watered sparingly at first, placed in a sunny window and watered more as growth progresses. When out of flower, store in some cool place and repot at proper season in fresh soil for another year's growth. See cut. Price, 3 cents each; six fine bulbs for 15 cents; twelve for 25 cents.

Winter Aconite.

Appears just after the Single Snowdrop. Its large, glossy yellow flowers, set in a close cup of leafy green, are wondrous cheerful in the dull Spring landscape; can be flowered in a cool room, used as edging for other bulbs, planted under the edge of evergreens, or naturalized under trees, or around rock work; must become a general favorite. Two for 6 cents; twelve for 16 cents.

Lasianthus—The tallest grower; should be planted in the center. Flowers large, bright rosy-pink. Leaves bright green and much divided.

Dieppi—Pure white blossoms. Dense, handsome, dark-green foliage, marked with black. Either variety, 3 cents each; 12 for 25 cents.

All Colors Mixed—A splendid mixture of all colors. The price is so low that at least a few should be included in every order. Price, 3 cents each; 12 for 25 cents.

Scilla Siberica-Star Hyacinth.

Scilla Siberica is one of the loveliest Spring flowers. It has a color almost as deep as the sky itself. It is quite hardy, and flowers out of doors at the same time as the Snowdrop, in front of which it has a charming effect. If planted in pots and kept indoors it may be had in bloom as early as Christmas. Its magnificent, bright blue color makes it suitable for any decorations whatever. Price, 2 for 5 cents; 25 cents per dozen.

Babianas—A charming genus, with leaves of the darkest green, thickly covered with downy hairs, and bearing showy spikes of flowers; rich red, rose, or the striking contrast of very distinct hues in the same flower. They vary from the richest carmine to the brightest blue, many of them being sweet-scented. As they are not hardy north of Washington, they should be grown in pots. Five or six bulbs in a five-inch pot make lovely and useful specimens.

Mixed Varieties, 3 for 10 cents; 35 cents per dozen.

NEW Hardy Tea Rose, Souv. de Pres. Carnot.

A charming new French Rose: one of the most promising introductions in many years, and we predict for it a grand future with the future-flower-growers. A strong, clean, healthy grower with large, clear, double blossoms. The color is a rich, bronzy salmon pink. Both buds and blooms are much larger and of a deeper, richer color, equalled only by the peerless Jacqueminot, and it will produce 20 blossoms to Jacqueminot's one. It is a rose that will make 10 to 15 feet growth in a season, and it shows a profusion of bloom every day. Pollage strong, healthy and luxuriant. Buds exquisite; flowers large, beautifully shaped, and of that rich, dark velvety crimson color seen only in the Jacqueminot. We do not hesitate to pronounce it the finest Rose in existence, as it will make a large growth and is loaded with its glorious blossoms all the time. For Winter-blooming it has few equals in beauty and probably none in profusion. It is the Rose to train up in a conservatory or bay window, where its exquisite blossoms will show to wonderful advantage.

Price, 16 cents each; 100, $5.00.

The Grandest of All New Roses.

CLIMBING ROSE—This new Rose might properly be called a Perpetual Blooming Climbing General Jacqueminot. Though a strong grower, it is not a true rambler, but produces clusters of blossoms on strong stems repeatedly. The color is a fine crimson, becoming a rich carmine, the petals being soft, shell-like, and the flowers profuse. Prune as you would a Cabbage Rose. Replant as soon as the foliage is tender and the new growth is 10 to 12 inches high.

Price, 16 cents each; 100, $5.00.

MAMAN COCHET—Best new Rose introduced this date. The Rose from France. fathered by the Clotilde Soupert. A strong grower, with large, fine, double blossoms. The color is a wonderful one, combining half-globe, perfectly double, and enchanting in fragrance and delicate coloring. A new introduction and a most desirable one. It is a hardy Rose, with large, beautiful, semi-double blossoms. It is magnificent and beautiful, blooming constantly and profusely. 15c., two for 25 cents.

We now offer the most remarkable Rose in cultivation, and extremely novel and beautiful. Jewel produces flowers that range in color from dark orange yellow to crimson, variegated, blotted, mottled, and striped, showing no two colors alike. Some will be dark yellow, others light yellow, buff, light and dark crimson, pink, blush, etc. It will have a wonderful value, we are sure. As may well be imagined, the slight which such a plant in bloom presents is a novel and beautiful one. It is a true Tea Rose, profuse in bloom, deep and strong in color, and in both bud and bloom exquisitely beautiful. It is a free grower and profuse bloomer. Price, 20 cents each; three for 60 cents; large, two-year-old plants, 50 cents each.

NEW YELLOW SOUPERT, “MOSELLA”—This splendid novelty we have just secured from Germany. It is almost identical with that of the same name that we have in profuse clusters of three to five flowers, which are very double, ball shaped and open, like a Camellia flower. The petals are rich, clear, and white, none being shaded with yellow or red, and extending to the middle of the petals. The plant is dwarf, but with a great profusion of bloom. Price, 20 cents each; large, two-year-old plants, 50 cents each.

The New Climbing Wootton Rose.

When the Wootton Rose was introduced some years ago, it created a sensation in this country; and it has ever since been known as the most popular rambler. The color of the New Climbing Wootton will therefore be still more apparent, inasmuch as it is perfectly hardy out of doors, having withstood many years of exposure to severe weather. The early growth and in one season produces shoots 15 to 30 feet in length and nearly an inch thick, the branches being broken up in small clusters of blossoms. The plant produces fragrant flowers from every leaf and stem. Much as Climbing Rambler has been praised it can scarcely be compared with the Climbing Wootton for profusion of bloom, beauty of color or magnitude of growth. $900 was paid for the original plant. Price for this magnificent New Climbing Wootton Rose and now for the first time, 26 cents each; large size, 50 cents each.

SPECIAL OFFER—20 Varieties, Your Selection from this List, for $1.00. Remember that our large, two-year-old Roses will cost you 20 cents each from this list. These are superb plants, and many of your old favorites. 8 large, two-year-old Roses from this list for ONE DOLLAR.

Beautiful and Fragrant Winter-Blooming CARNATIONS.

Next to Roses, we place Carnations as being the prettiet and sweetest flowers grown. They are especially adapted for Winter flowers. A customer writes:

Our better half had a plant of both red and white Carnations in the house last Winter, placed there in the Fall before they commenced blooming. They grew beautifully, and about the first of December commenced blooming. From that until May they were in flower continuously. At times as many as fifty blooms could be seen on them at once, and they completely filled the house with their fragrance.

The form is remarkable; the petals are incurved and twisted, overlapping each other in irregular fashion, and resembling talons. The King of foliage plants, far out-showing all others. It seems to feed on the rich metals of the soil, and spread their lustrous tints over its leaves. Over it the soils composed of loam, woods earth and sharp sand. They require a moist atmosphere in a shady situation; suitable for warden cases. Do not allow the sun to strike the leaves while wet, and do not, overwater. We have a number of the leading and distinct kinds that we will furnish for 16 cts. each, or 4 for 50 cts., 10 for $1.00. They are the most beautiful and most admired by all. Try a set and see how pretty they are.

Single Flowering Tuberous Begonias.

For Pot Plants, are now classed among the handsomest Flowering Bulbs. Bloom profusely the first year and all summer. The new variety, or that of the crimson variety, has in color the most brilliant and dazzling Geranium flowers; and from the time the first blossom appears until all growth is stopped by frost they are never out of bloom. The foliage is almost hidden under the load of blossoms. For bedding plants outdoors, or as shrubbery in the house, the Tuberous Rooted Begonias can not fail to give satisfaction, even to the most inexperienced, as they require but little more attention than the Geranium. We have fine bulbs in the following colors: Crimson, Scarlet, Rose, Yellow, Pink and White.

The flowers are not more than half the size of the common variety, and therefore can be used with telling effect in bouquets. It is in every respect superior as a house plant to the larger growing variety. 15 cents each; 4 for 50 cents. Large plants 50 cents each.

**BLACK CALLA (ARUM SANCTUUM) or Solomon’s Lily of Palestine**—This magnificent flower, often measures over a foot in length and reaches to eight inches in width. Beautifully shaped and turned, sweet scented, the color is of the richest velvety purple-black; while the outside is of pleasing green. Our fine bulbs are sure to bloom if planted in rich soil, two inches below the surface. Requires the same culture as the old well known Calla. 10 cents each.

**WHITE CALLA, OR LILY OF THE NILE**—This old favorite is too well known to require any description. We offer dry roots, as they are superior for forcing and Winter-flowering purposes; they come into bloom quickly and require less room, making less foliage. Extra large, dormant roots, 25 cents each; 3 for 60 cents. First size, 10 cents each; 3 for 25 cents.

**SPOTTED LEAF CALLA**—(Richard Alba Maculata) This plant is always ornamental, even when not in flower, the dark green leaves being beautifully spotted with white. In other respects the plant is the same as the favorite White Calla—Smaller habit. 10 cents each; 3 for 25 cents.

**OXALIS ORTGIESI GOLDEN STAR OXALIS.**

Few new plants will give better satisfaction than this, as it is a perpetual bloomer in ever sense of the word. It is in full bloom every day in the year when grown in a pot of good soil and with plenty of sun. Grows as freely as a Geranium in any situation. Without bulbs, in which respect it differs from other Oxalis. Dwarf growing, branching freely and hoarding at all times with clusters of bright golden star-shaped flowers, which do not close at night like other Oxalis. 10 cents each; three for 25 cents.

The Beautiful Scarlet Achnania—dust as many other plants are and withstands indifferent care where many others would droop and die. Price, 10 cents each; three for 25 cents.
New Dwarf Allamanda

**ALLAMANDA WILLIAMSI**—This handsome variety is entirely distinct from all others, being quite dwarf and in no way resembling a climber, but forming a compact bush with trusses of bloom at every point, and having two to four expanded blooms on each extremity at the same time and buds innumerable. It continues flowering the whole Summer, and, with proper management, in the Winter also. The flowers are from three and one-half to four and one-half inches in diameter, of a very rich, yet delicate tint of yellow, and are deliciously scented. Fine plants 15 cents each; two for 25 cents.

**SWANSONIA ALBA**—A most desirable everblooming plant, with pure white flowers, produced in sprays from twelve to twenty flowers each, the individual blooms resembling a sweet pea. As a decorative plant for the window or conservatory we know of nothing that will give as much satisfaction as the Swansonia. Its easy culture, growing in almost any light position, its freedom of bloom, rarely ever being out of bloom, and the grace and beauty of the flower and entire plant will undoubtedly make this one of the most popular plants in cultivation. Price, 10 cents each.

**ASTILBE,** or SPIRREA, **JAPONICA.** (Ready in November)—The flowers are borne in large, feathery panicles of white and last a long time in bloom. Large quantities are forced by florists, though a perfectly hardy herbaceous plant. This is undoubtedly one of the most beautiful objects grown, its foliage and flowers combined making it one of the finest gems for Winter and Spring decoration in the house and conservatory, while for grace and elegance as a cut flower it has few equals. 15 cents each.

**GENISTA FRAGRANS,** or FOUNTAIN OF GOLD—A most desirable Spring flowering plant, producing its fragrant, bright golden yellow flowers in the greatest profusion. As a Winter plant of the easiest culture it is unsurpassed. Especially desirable for Easter decoration. Price, 10 cents each.

**New Justicia Velutina.**

A native of Brazil, Justicia, grown extensively by Parisian florists, for garden and table decoration. When only a few inches high it begins to bear clusters of large, pink, feather-like flowers, lasting for a long time, and is never thereafter out of bloom—frequently fifty spikes at one time. An excellent novelty. Of easy growth. Highly praised. Price, 25 cents.

**Agapanthus Umbellatus.**

(The Blue African Lily.)

Imagine a clump of bright evergreen foliage, spreading 3 to 4 feet if permitted, and surmounted by thirty to forty spikes of large, bright blue, lily-like flowers! It is a grand sight. Blooms freely in small pots, finest culture. 20 cents.

**BOUGAINVILLEA SANDERIANA**—We have grown this most useful flowering plant in a greenhouse, where it has continued flowering for 7 months, all plants being covered with blossoms from May until December. Produces as freely as a fuchsia, dazzling, rosy, crimson flowers, lasting long in perfection. Awarded first-class certificate by the Royal Horticultural Society. See cut. Price, 25 cents each; 3 for 60 cts.

**Clerodendron Balfouri**—Much ado has been made over certain climbers of late, but scarcely can any compare with this. No plant in cultivation displays such colors of creamy-white and scarlet and such profuse flowering. Young plants are often entirely covered with bloom. When only a foot high as many as 20 to 30 flowers can be counted, and this of course, increases as the plants become old. An engraving published in an English horticultural paper shows a plant with more than 400 flower bunches. As it requires no care to grow, every one can be sure of perfect success and a beautiful effect with but little trouble. Thrives in a rich soil and may be planted out in summer. 15 cts.; 2 for 25c.

The flowers are as large as a silver dollar, are borne on stems 10 to 12 inches long. Price, 15 cents each.

CYPERUS GRACILIS.

This is a new dwarf variety of the popular Umbrella Plant, with very narrow foliage, which makes it a much more desirable, graceful plant. It is most useful, either as an aquarium plant or as an ordinary house plant, succeeding under almost any condition. Especially fine and beautiful in jardinières for table decoration. Price, 15 cents each; 3 for 25 cents.

CYPERUS, OR UMBRELLA PLANT—The plant grows finely in shallow water with rich soil or mud, soon throwing up long stalks which are surmounted with narrow, dark green leaves, arranged in such a manner as to suggest the name of Umbrella Plant. Makes a beautiful ornamental pot plant, fine for aquarium. Price, 10 cents each; 3 for 25 cents.

STRIPED LEAVED PEPEROMIA.

Window Plants will be popular. So thick and waxy like are the leaves of this parlor gem that nearly every one takes it to be an artificial plant. The leaves are distinctly variegated, white and green, and have the appearance of being powdered with frosted silver. Few plants could be more useful for table decoration, and none will stand ill-usage so readily. Its small spikes of Mignonette-like flowers are quite interesting. Price, 10 cents each.

PRIMULA—CHINESE FRINGED PRIMROSE.

Few house plants afford better satisfaction than this. It requires to be kept cool, a north window suiting it best. Care should be taken in watering that no water gets on the buds, as it causes them to rot.

Under the commonest culture they bloom continuously for months, and by starting at intervals a succession of their splendid flowers, may be had nearly the whole year round. They are also exceedingly useful, if planted out in a warm frame, shaded from the bright sun, for growing for cut flowers during the Summer months. Fine bulbs 15 cents each; six colors 75 cents. Otaheite fruits immediately after flowering, bearing fruit about one half the size of the ordinary orange, retaining in a marked degree the color and fragrance which made the Otaheite Orange so desirable a plant for house culture, and is of the easiest culture. Requires but little sunlight, and flowers and fruits when but 12 to 15 inches high. As a pot plant it is as novel and beautiful as it can be grown. It can be grown with an abundance of the far-famed delicate and fragrant orange blossoms. We have grown a large number of clean, vigorous plants that will bloom and fruit at once; of this beautiful Otaheite Orange meets its demands to our friends in the vicinity of sterling worth and merit.
